

2017 ACM SYMPOSIUM ON CLOUD COMPUTING – CALL FOR POSTERS

The SoCC poster sessions showcase works-in-progress in an informal setting. Topics of interest are the same as the research topics in the SoCC conference call for papers (<https://acmsocc.github.io/2017/papers.html>). A single page description should be submitted to the HotCRP site no later than **July 13, 2017** at 17:00 Pacific Standard Time. The SoCC 2017 poster committee will review all proposals and notifications will be sent out by July 27, 2017. **Accepted proposals will be published in the conference proceedings.** While anyone can submit a proposal, preference will be given to posters where the primary contribution is from one or more students or from an industry/start-up organization. Students must present student posters at the conference. An award will be given to the best overall **student** and **industry/start-up** poster, judged by attendees during the conference. Submissions to the conference paper track are also automatically considered for a poster, so there is no need to submit a separate poster proposal.

WHY SHOULD YOU SUBMIT A POSTER?

Presenting a poster is a great opportunity, especially for students, to obtain interesting and valuable feedback on ongoing research from a knowledgeable crowd at the conference. Moreover, accepted proposals will be published in the conference proceedings in citable form.

WHAT IS A POSTER?

We define a poster to be A0 paper size in portrait mode (841x1189mm), to which you can affix visually appealing material that describes your research. Alternatively, you can use the space as a continuum. You should prepare the best material (visually appealing and succinct) that effectively communicates your research problem, techniques, results, and what is novel and important about your work. Note that you do not submit such a large-format image; only an abstract describing in text what the poster would present. The abstract should clearly state: (a) the problem being addressed, (b) that makes this problem interesting, important, and difficult, (c) your approach to the problem, and (d) the key contribution. In the final version of the abstract, we encourage (not require) you to include a URL providing additional information about your work to the attendees.

WHAT TO SUBMIT

You must submit a one-page abstract in PDF format that describes your work. Prepare your abstract using ACM conference style, 10pt font with two columns, 0.75 inch margins and 1/3 inch space between columns. Word documents will not be accepted. Accepted proposals will be published in the conference proceedings.

WHERE TO SUBMIT

Submission instructions will be available on HotCRP: <https://acmsocc.github.io/2017/posters.html>

Submissions are single blind, so please include authors' names and affiliation. When submitting, indicate if the submission should be considered for the student/industry best-poster award.

IMPORTANT DATES

- Submission deadline: July 13, 2017 at 17:00 PST
- Acceptance Notification: July 27, 2017

POSTER CHAIR

- Irina Calciu (VMware Research Group)
